Software

Systems Software

Application
① Help user review some code for freshness

② Learn less/buffer overflow

③ Law can help do

Why can law do

Software 50%
\[ \text{Form} \rightarrow \text{Password} \rightarrow \text{Username} \rightarrow \text{Login} \rightarrow (x_i = 1) \rightarrow \text{Verification} \rightarrow \text{Response} \rightarrow \text{Web page} \]
It works
3 humans do not know how

- phase, phase
- not an error, a feature
- errors in design of complex system

Vulnerable
What can vulnerabilities do

- change software behavior
- stop help
- zem
- Smalp freshmen
- Person's information
- Send DDB
