- 生产者-生产者
L is an ADF (Abstract Data Type) object.

Monitors

- Supported in threads
- Needs language support
operator -> method/function

Wait

operator

memory

value

no

Condition

condition var, dele

no because

move

m1

if (c1 < c2, c1, c2)

Condition

m1 ?

variable

loop

exit
Mathematical expression
and explanation

Time

on a point in
within a matrix

a greater to exceed
only if true to

a greater function

The next function
Wait (C1)

Wait

Wait (C2)

\( f_1 \) \( \times \lambda \)

\( f_2 \)

Go to Sleep Forever

Process Instruction
Recall the moments
- for any moment
- when women
- go to grocery
- store

want (c) \rightarrow exact the moment

\text{wt}(c) \rightarrow \text{step} \rightarrow \text{work}(c)
\[ \text{or} \quad C_1 \ x \ y \ z \ x \ y \ z \]

\[ \text{if thread is weighing} \]

\[ \text{ignored (no-op)} \]

\[ \text{...to C1, the string is broken...} \]

\[ \text{...is not if no threat is broken...} \]
I think or I draw a map.

2. Continues as D exercises when

so left on the number ending 8

or with again, for example
d as exercises after e etc.

D to find on another such word

6 7 8 success

Money versions —
\[ \begin{align*}
\text{if} & (\text{count} = N) \quad \text{sort} (C) ; \\
\text{put} (\text{item}) \\
\text{produce cond} \\
C_1 & = \text{producer cond} \\
C_2 & = \text{consumer cond}
\end{align*} \]
\[ f(x) = \begin{cases} \text{if } \cos x = 0 \text{ then } c_2 \end{cases} \]
\[ \text{If } \mathbf{u} \cdot \mathbf{v} = 0 \text{ vector (cos 0)} \]

\[ \text{vec } - \]

\[ \text{vec } \rightarrow \]

\[ \mathbf{v} \]
Be prepared: defects, not surgery.

Futurism - minus meta-events, as retrieval.

Cia, leg no oblige.

The matrix
Physics

Physics - numbers - lacks (numbers)

Physero deeds not here, numbers...

Numbers define a condition

Condition: numbers ever...
